Science and technology are important parts of our day to day life. Subsequently, research on science and technology have assisted in advancing various fields including Mathematics, Astrophysics, Space technology, Nuclear energy and more. In this context Department of Chemistry, AIET organized a seminar on “Importance of Science, Technology, & Math for Research” on Saturday, 19/01/19 in MBA Seminar Hall.

Sri. P. B. KOTUR, Head-Global Fresher's Engagement Program Wipro Limited was the resource person of the seminar enlightened the students and faculties by motivating them through inspirational talk. He explained how science, technology and mathematics helps to achieve greater heights in research and thereby moulds the scientific career, to be an asset to the society. Overall seminar concentrated on how the research acts as powerful and pleasant platform to engage young students and faculties with a common focal point of science, technology and mathematics. It enhances the curiosity in student minds could be fulfilled by providing them a right podium to share their ideas with likeminded people and experts in Science & Technical fields.

The seminar was conducted for faculties and students.
